# The Swiss "Riviera Pearl" Cyclamens

(Persicum Giganteum)

Part view of the Nurseries where Cyclamen Seeds are re-selected

## ONLY ONE QUALITY : THE BEST

There is nothing finer than the Cyclamen as a garden plant and for indoor decoration. One of the most wonderful perennial plants and by far the most astoundingly beautiful of its race.

The extremes of climate in Switzerland assure the plant a good constitution and an incomparable resistance.

As you will see in the above illustration, the plant grows vigorously. It is of easy cultivation and for a long time bears the most charming flowers and beautiful green foliage.

Both in flower and foliage, these new varieties are veritable giants, and the plants are stout and self-supporting.

Flowers are substantial, of exceptional size and perfect form, and the petals beautifully curved. They are excellent for cutting.

In fact there are shades which were not thought possible some years ago and which have now attained in Europe a great reputation. The colours are distinct.

My varieties are the ones usually grown for exhibition purposes. They are creating quite a sensation in the horticultural world.

The Cyclamen Seed which I offer is something very superior, something that I can thoroughly recommend and that will give the greatest satisfaction to the grower. It has been grown, hybridized and re-selected for over 70 years. That is why mine is now looked upon as the most beautiful of its race in the world to-day.

**Cultivation :** Sow from August to October. Special instructions will be given with order only on application.

Test for yourself with one of my original packets and you will surely re-order.
